Let's build something meaningful

Professional Summary

Senior Staff Engineer with 17+ years of experience across full stack product engineering, platform architecture, distributed systems, and cloud infrastructure. Co-founded Alaya and built the platform from zero to acquisition by Benevity, taking ownership from first product iteration through scale, team growth, and technical due diligence.

Brings founding-engineer ownership with strong hands-on depth in TypeScript, JavaScript, Node.js, Python, React, PostgreSQL, AWS, Docker, Kubernetes, REST APIs, data-intensive systems, and AI-augmented engineering workflows. Focused on roles where end-to-end product delivery, sound technical tradeoffs, and early-stage platform building matter.

Professional Experience

Senior Staff Engineer

2021 - 2026

Benevity — Geneva, Switzerland (Remote)

Platform evolution post-acquisition, cross-team architecture, AI-assisted engineering practices

Senior IC driving platform evolution in a global distributed engineering organization after the acquisition of Alaya. Worked across teams on architecture, integration, data-intensive workflows, and AI-assisted engineering practices.

- Pioneered AI-assisted engineering practices including LLM-based code review, multi-agent workflows, and automated quality patterns
- Architected platform integration work connecting the acquired European product into Benevity's broader platform
- Designed data integration pipelines linking 20+ external data sources with compliance and reporting requirements
- Improved developer workflow and delivery through CI/CD modernization, automated testing infrastructure, and cross-team technical coordination
- Operated as a technical lead across Europe and North America, contributing to architecture decisions in a distributed environment

Technologies: Python, TypeScript, Node.js, React, Vue.js, MongoDB, PostgreSQL, AWS, Docker, Kubernetes, CI/CD, AI/ML tooling

Cofounder & Head of Technologies

2016 - 2021

Alaya (now Alaya by Benevity) — Gland, Switzerland

Employee purpose platform for enterprise giving, volunteering, and CSR engagement

Co-founded the company and built the entire technology platform from zero. Owned architecture, backend and frontend delivery, cloud infrastructure, engineering process, and team building through multiple growth stages.

- Designed and built the full platform architecture from scratch, including APIs, data models, service boundaries, and AWS infrastructure
- Took the product from blank page to production SaaS used by enterprise clients across multiple countries
- Made foundational architecture decisions around service decomposition, storage, and API design that remained durable through acquisition
- Built and grew the engineering team, set the hiring bar, introduced code review practices, and mentored engineers on system design
- Led the technical side of due diligence for the acquisition by Benevity

Technologies: TypeScript, React, Redux, Node.js, MongoDB, PostgreSQL, Redis, Docker, AWS, REST APIs

Full Stack Engineer

2016 - 2018

Etat de Geneve — Geneva, Switzerland

Public sector applications for Geneva's education system

Built public sector applications for the SIEF education platform while coordinating with architecture, infrastructure, and business teams.

- Developed full stack applications for the Canton of Geneva education platform
- Worked across multiple teams with stronger compliance, governance, and delivery constraints
- Built experience operating in structured multi-stakeholder environments

Technologies: Java, Spring Boot, Hibernate, Angular, AngularJS, REST, Oracle, Jenkins

Software Engineer

2015 - 2016

SQLI Group — Geneva, Switzerland

Online dispute resolution platform

- Built an online commercial dispute resolution platform with AngularJS and Java/Spring
- Worked across frontend, backend, and database layers in a production setting

Technologies: JavaScript, AngularJS, Java, Spring MVC, Spring Data, Hibernate, SQL Server, REST

Hybrid & Desktop App Developer

2014 - 2015

Castr (via MC Dev consulting) — Paris, France

- Developed hybrid mobile and desktop applications for a geolocated social news platform
- Contributed to cross-platform product delivery as an independent contractor

Technologies: JavaScript, ES6, AngularJS, Node.js, Express, Ionic, Cordova

Software Architect (GWT)

2011 - 2014

Sagemcom — Paris, France

Telecom set-top boxes

Designed an embedded UI platform for testing and validation across multiple set-top box environments for major telecom operators.

- Designed and built an embedded JavaScript UI platform using GWT for functional testing across diverse hardware
- Bridged embedded systems and UI layers, improving validation workflows and reducing QA friction
- Platform was showcased at CES 2011 and CES 2012

Technologies: GWT, JavaScript, Java, Embedded Systems

Software Engineer

2007 - 2011

Artaud Courtheoux et Associes — Paris, France

- Built enterprise software applications across Java and .NET environments

Technologies: Java, .NET, Enterprise Applications

Skills

PLATFORM & ARCHITECTURE

Platform Engineering · Software Architecture · System Design · Distributed Systems · API Design (REST) · Cloud Infrastructure (AWS) · Scalability & Reliability · Microservices · Event-Driven Architecture

TECHNICAL

Python · TypeScript / Node.js · React / Vue.js · PostgreSQL / MongoDB · Redis · Docker / Kubernetes · CI/CD & DevOps · AI/ML Integration & Tooling · Java / Spring

LEADERSHIP & STRATEGY

Technical Cofounder (0 to Acquisition) · Technical Leadership · End-to-End Product Ownership · Engineering Team Building & Mentoring · Cross-Functional Collaboration · Startup-to-Enterprise Scaling · AI-Augmented Engineering Workflows

Education

Master's Degree (MSc) — Computer Engineering

2004 - 2007

ESGI - Ecole Superieure de Genie Informatique — Paris, France

Languages

French — Native English — Professional
