Professional Summary

Senior Staff Engineer with 17+ years of experience building full-stack products, backend systems, cloud infrastructure, and AI-augmented engineering workflows. Co-founded Alaya and built the platform from a blank page to acquisition by Benevity, validating the architecture, product execution, and engineering leadership behind the company.

Combines founding-engineer ownership with deep hands-on work across TypeScript, Node.js, React, Python, APIs, distributed systems, and data-intensive SaaS platforms. Now focused on LLM-powered applications, agentic workflows, and shipping product experiences that balance speed, reliability, and real business value.

Professional Experience

Senior Staff Engineer

2021 - 2026

Benevity — Geneva, Switzerland (Remote)

Global leader in corporate purpose software, $1B+ valuation, 800+ employees

Senior individual contributor working across platform and product architecture after the acquisition of Alaya. Drove cross-team technical decisions, integrated product capabilities across regions, and introduced practical AI-assisted engineering workflows in a distributed organization.

- Pioneered AI-assisted development practices across engineering, including LLM-based code review, prompt patterns, and multi-agent workflows
- Architected integration work connecting the acquired European product into Benevity's broader platform for enterprise customers
- Designed data integration pipelines connecting 20+ external data sources with structured compliance and reporting workflows
- Worked across frontend, backend, and platform concerns, supporting product delivery and long-term system design
- Led developer experience improvements in CI/CD, automated testing, and engineering quality across distributed teams

Technologies: TypeScript, Node.js, Python, React, Vue.js, MongoDB, PostgreSQL, AWS, Docker, Kubernetes, CI/CD, LLM tooling

Cofounder & Head of Technologies

2016 - 2021

Alaya (now Alaya by Benevity) — Gland, Switzerland

Employee purpose platform for volunteering, giving, and CSR engagement

Co-founded the company and built the full product and technical platform from zero. Owned architecture, backend systems, frontend delivery, cloud infrastructure, and the first engineering hiring and operating practices.

- Built the product from zero to production, covering frontend, backend, APIs, data models, and AWS infrastructure
- Scaled the platform into a SaaS product used by 50+ enterprise clients across Switzerland and France
- Made foundational architecture decisions around service boundaries, data storage, and system evolution that held through acquisition
- Built and mentored the early engineering team, setting hiring standards, code review habits, CI/CD, and technical direction
- Led technical due diligence for the Benevity acquisition and proved the platform could scale beyond its startup phase

Technologies: TypeScript, React, Redux, Node.js, MongoDB, PostgreSQL, Redis, Docker, AWS, REST APIs

Full Stack Engineer

2016 - 2018

État de Genève — Geneva, Switzerland

Canton of Geneva public administration

Built public sector applications for Geneva's education information system in collaboration with architecture, infrastructure, and business teams.

- Developed full-stack applications for the SIEF education platform serving the Canton of Geneva
- Worked across backend services, frontend delivery, and multi-team coordination in a regulated environment
- Built early experience in compliance, data governance, and structured delivery at institutional scale

Technologies: Java, Spring Boot, Hibernate, Angular, AngularJS, REST, Oracle, Jenkins

Software Engineer

2015 - 2016

SQLI Group — Geneva, Switzerland

Consulting group embedded at eJust startup

- Built an online commercial dispute resolution platform with AngularJS on the frontend and Java/Spring on the backend
- Delivered full-stack product work in a startup environment with direct business impact

Technologies: JavaScript, AngularJS, Java, Spring MVC, Spring Data, Hibernate, SQL Server, REST

Hybrid & Desktop App Developer

2014 - 2015

Castr (via MC Dev consulting) — Paris, France

- Developed the hybrid mobile app and desktop version for a geolocated social news platform
- Worked across client application layers, backend services, and cross-platform delivery

Technologies: JavaScript, ES6, AngularJS, Node.js, Express, Ionic, Cordova

Software Architect (GWT)

2011 - 2014

Sagemcom — Paris, France

Global telecom equipment manufacturer

Designed an embedded UI platform for testing and validation across multiple set-top box environments for major telecom operators.

- Designed and built an embedded JavaScript UI platform using GWT for functional testing across multiple hardware environments
- Bridged embedded systems and UI layers, improving validation workflows across firmware and product teams
- Platform was showcased at CES 2011 and CES 2012

Technologies: GWT, JavaScript, Java, Embedded Systems

Software Engineer

2007 - 2011

Artaud Courtheoux et Associés — Paris, France

- Built enterprise software applications across Java and .NET stacks

Technologies: Java, .NET, Enterprise Applications

Skills

PLATFORM & ARCHITECTURE

Full-Stack Product Engineering · LLM Integration and Agentic Workflows · Software Architecture · System Design · API Design (REST) · Platform Engineering · Distributed Systems · Microservices · Cloud Infrastructure (AWS) · Scalability and Reliability

TECHNICAL

TypeScript / Node.js · React / Vue.js · Python · MongoDB / PostgreSQL · Redis · Docker / Kubernetes · CI/CD and DevOps · GitHub Actions · Java / Spring · AI/ML Integration and Tooling

LEADERSHIP & STRATEGY

Founding Engineer Ownership · Technical Cofounder, 0 to Acquisition · Technical Leadership · Engineering Team Building and Mentoring · Cross-Functional Collaboration · Startup-to-Enterprise Scaling · AI-Augmented Engineering Workflows · Agile and DevOps Practices

Education

Master's Degree (MSc) — Computer Engineering

2004 - 2007

ESGI - École Supérieure de Génie Informatique — Paris, France

Languages

French — Native English — Professional
